Fall 2019

# Course Outlines

## Statistical tools

- histogram
- mean, median, variance
- covariance, correlation coefficient
- p-value
- QQ-plot, box-plot

## Pitfalls of spatial data

- MAUP
  - zone effect
  - scale effect
- Ecological fallacy

## Geographic distribution

- mean center, median center
- standard distance, standard ellipsoid distance

## Point pattern analysis methods

- 1st order
  - Quadrat methods
  - Density estimation
- 2nd order
  - nearest neighbour distance
  - distance functions K,G

## Hypothesis testing of CSR

- CSR: complete spatial randomness
- Hypothesis testing

## Lab

- Lab 7: Point Pattern Analysis
- Homework assignment

# *Areal data and spatial autocorrelation*

---

## Basics

- Spatial neighbourhood
- Spatial weight matrix

## Measuring spatial autocorrelation

- Moran's  $I$  and Moran's  $I$  scatter plot
- Hypothesis testing
  - permutation test

## Consequences of ignoring spatial autocorrelation

## Lab

- Lab 8-a: Getting started with GeoDa
- Lab 8-b: Exploratory analysis using GeoDa

## Representation of spatial fields

- Contours
- Lattice
- TIN

## Spatial interpolation

- Deterministic interpolator
  - Nearest neighbour
  - Natural neighbours
  - Trend surface
  - Inverse distance weighting
  - Spatial splines
  - Triangulation
- Stochastic interpolator
  - Kriging family of methods

How to make choices of different spatial interpolation methods?

## Kriging

- Semivariogram, covariogram
  - Range, nugget, sill
  - Empirical semivariogram and theoretical semivariogram models
- Kriging
- Advantages of Kriging over deterministic methods, such as IDW

## Lab

- Lab 9: Spatial interpolation and Kriging

## Characteristics of uncertainty

- Unavoidable
- Uncertainty in points, networks, area-class and DEM
- Assessment of impact of uncertainty and the propagation

## Lab topics

- Map projection
- Find what's inside
- Find what's nearby
- Raster spatial analysis
- Model builder
- Geocoding
- Point pattern analysis
- Exploratory analysis (Moran's I)
- Spatial interpolation
- Kriging

## Software

- ArcMap
  - Arctoolbox: 3D analyst, spatial analysis, spatial statistics, geostatistics
- GeoDa (open-source)
- OpenStreetMap (mapathon)

## Spatial autocorrelation

- First law of geography
- These terms often used interchangeably: spatial autocorrelation, spatial patterns, spatial dependence, spatial context

## Methods and tools to explore and measure spatial autocorrelation

- Point pattern → K and G functions, kernel density estimation
- Areal data → Moran's I
- Geostatistical data → Semi-variogram (i.e., covariogram)

## Read and use maps/geospatial data critically!

- Map projection
- Scale and zone of the geospaital data (remember MAUP?)
- In the spatial methods we covered, parameters can be 'manipulated' to show different results
  - Look at these parameters when reading maps
  - Include these parameters when showing resultant maps

# *Project presentation and report*

---

## Project presentation

- December 7th, morning session (9:30 - 11:00am) for graduate students, and afternoon session (1:30 - 3:00pm) for undergraduate students.
- PechaKucha style (20x20), about 7 minutes each group

## Project report due: COB Monday, December 9th

- Put your report on your folder on Techshare, use the report template
- Upload your project materials, including presentation, datasets and results to your folder on Techshare

## Format of 2nd exam

- December 2nd, 2:00-3:00pm, Holden Hall 121 (classroom)
- Open books and open notes, but access to any digital devices (e.g, phones, tables, computers) are not allowed
- Multiple choices (with possible multiple correct answers) plus writing questions

## *Graduate level class and links*

---

### Graduate class available

- Geog 5330: Applied Spatial and Spatiotemporal Data Analysis
- Graduate level class
- Counted toward the GIS certificate

### Map links

- <http://www.gis.ttu.edu/gist4302/links.html>
- @ttugis, @guofengcao

# Thanks

---

## Course evaluation

- Online evaluation now, you should have received the link.

Thank you, any questions/comments
